# Research Question and Why

Do students at our school think that the classroom should have more fun activities to do in the classroom?

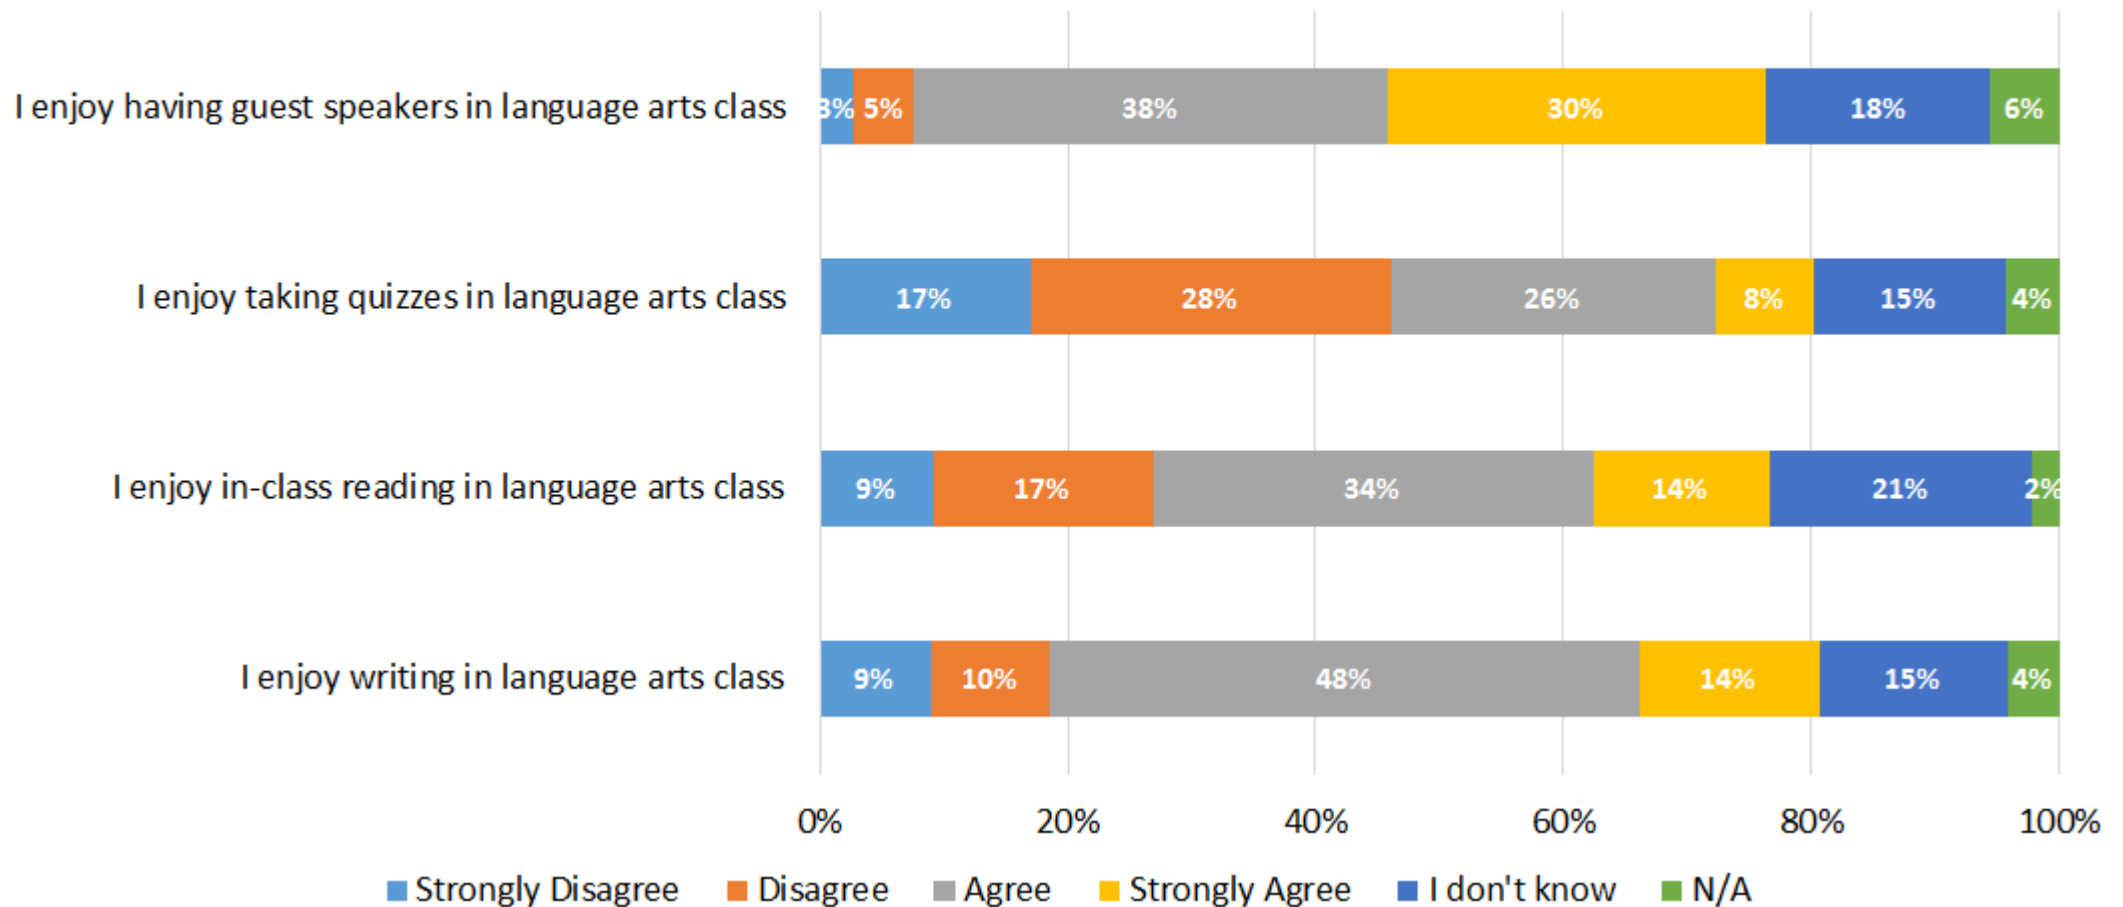

What do they want to do about it?

# Data Collection Method and Why

- We used a survey
- 145 students were surveyed
  - 60 students from the 6<sup>th</sup> grade
  - 40 students from the 7<sup>th</sup> grade
  - 45 students from the 8<sup>th</sup> grade
- We wanted to know which activities students enjoy in language arts, math, science, and social studies

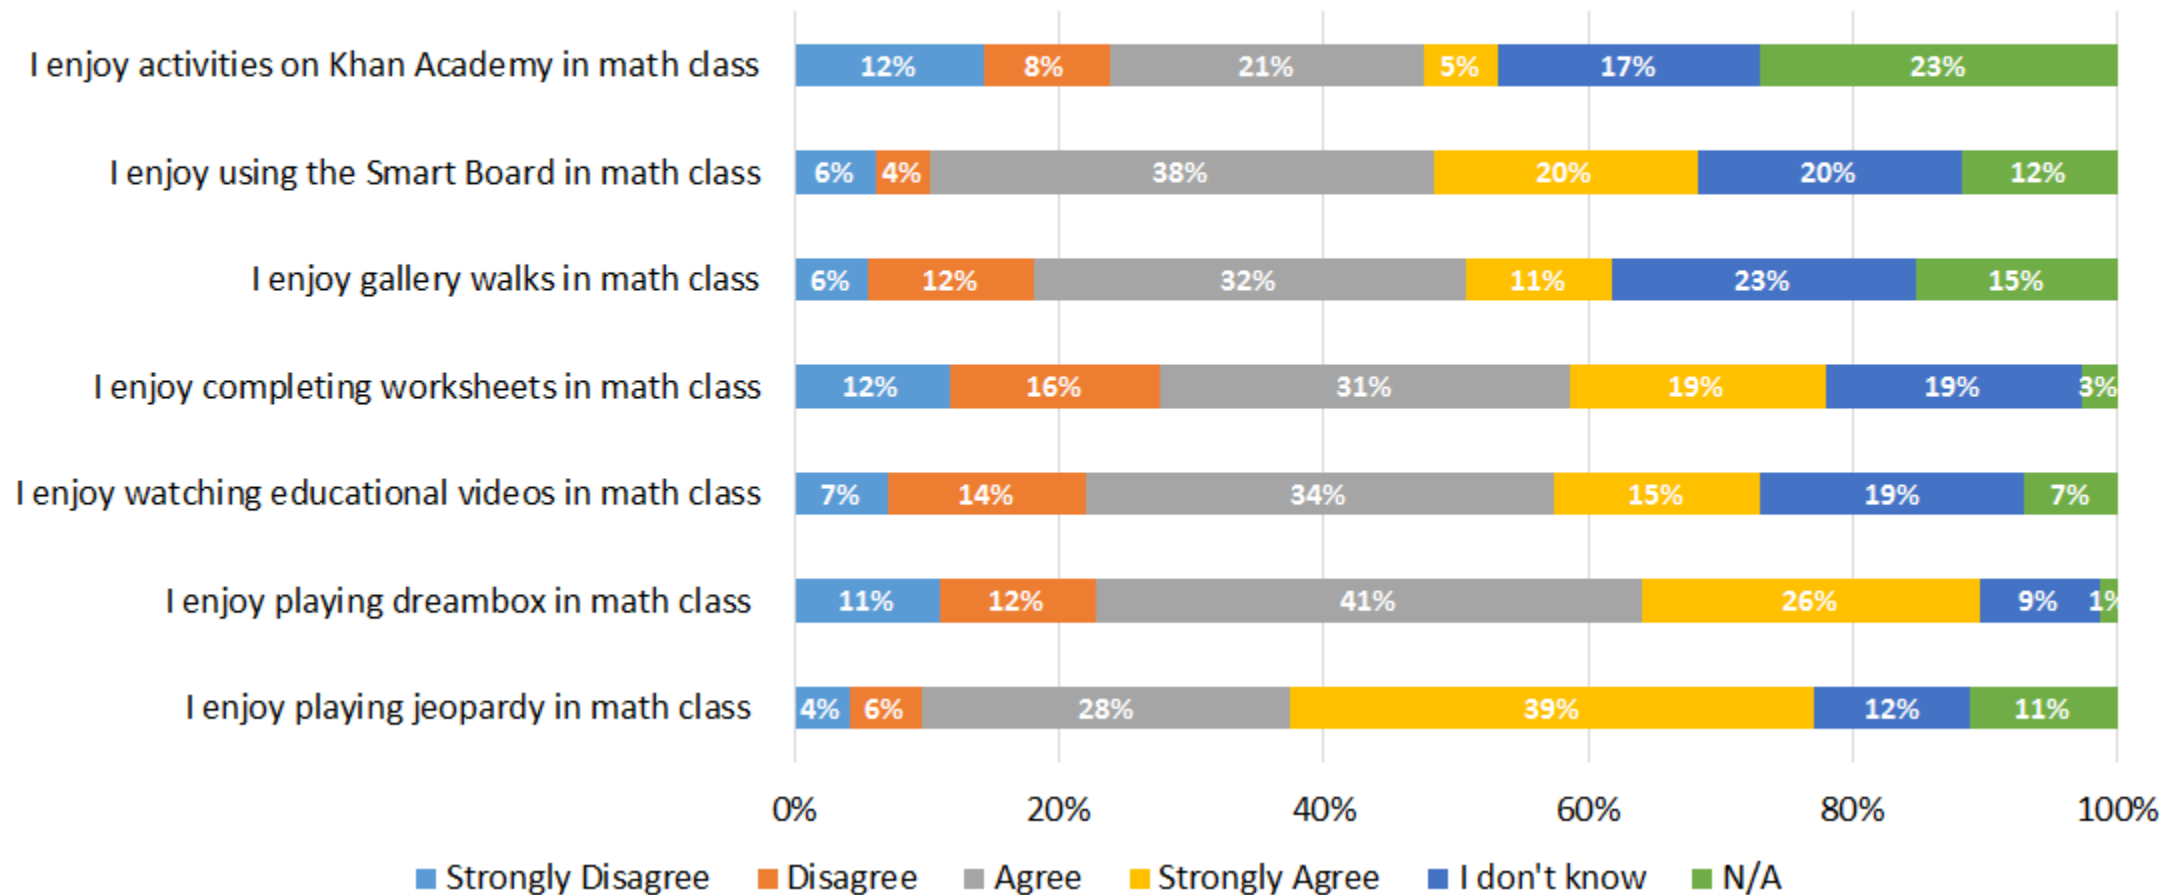

# Findings: Language Arts Class

More than half the students enjoy writing and having guest speakers in language arts class.

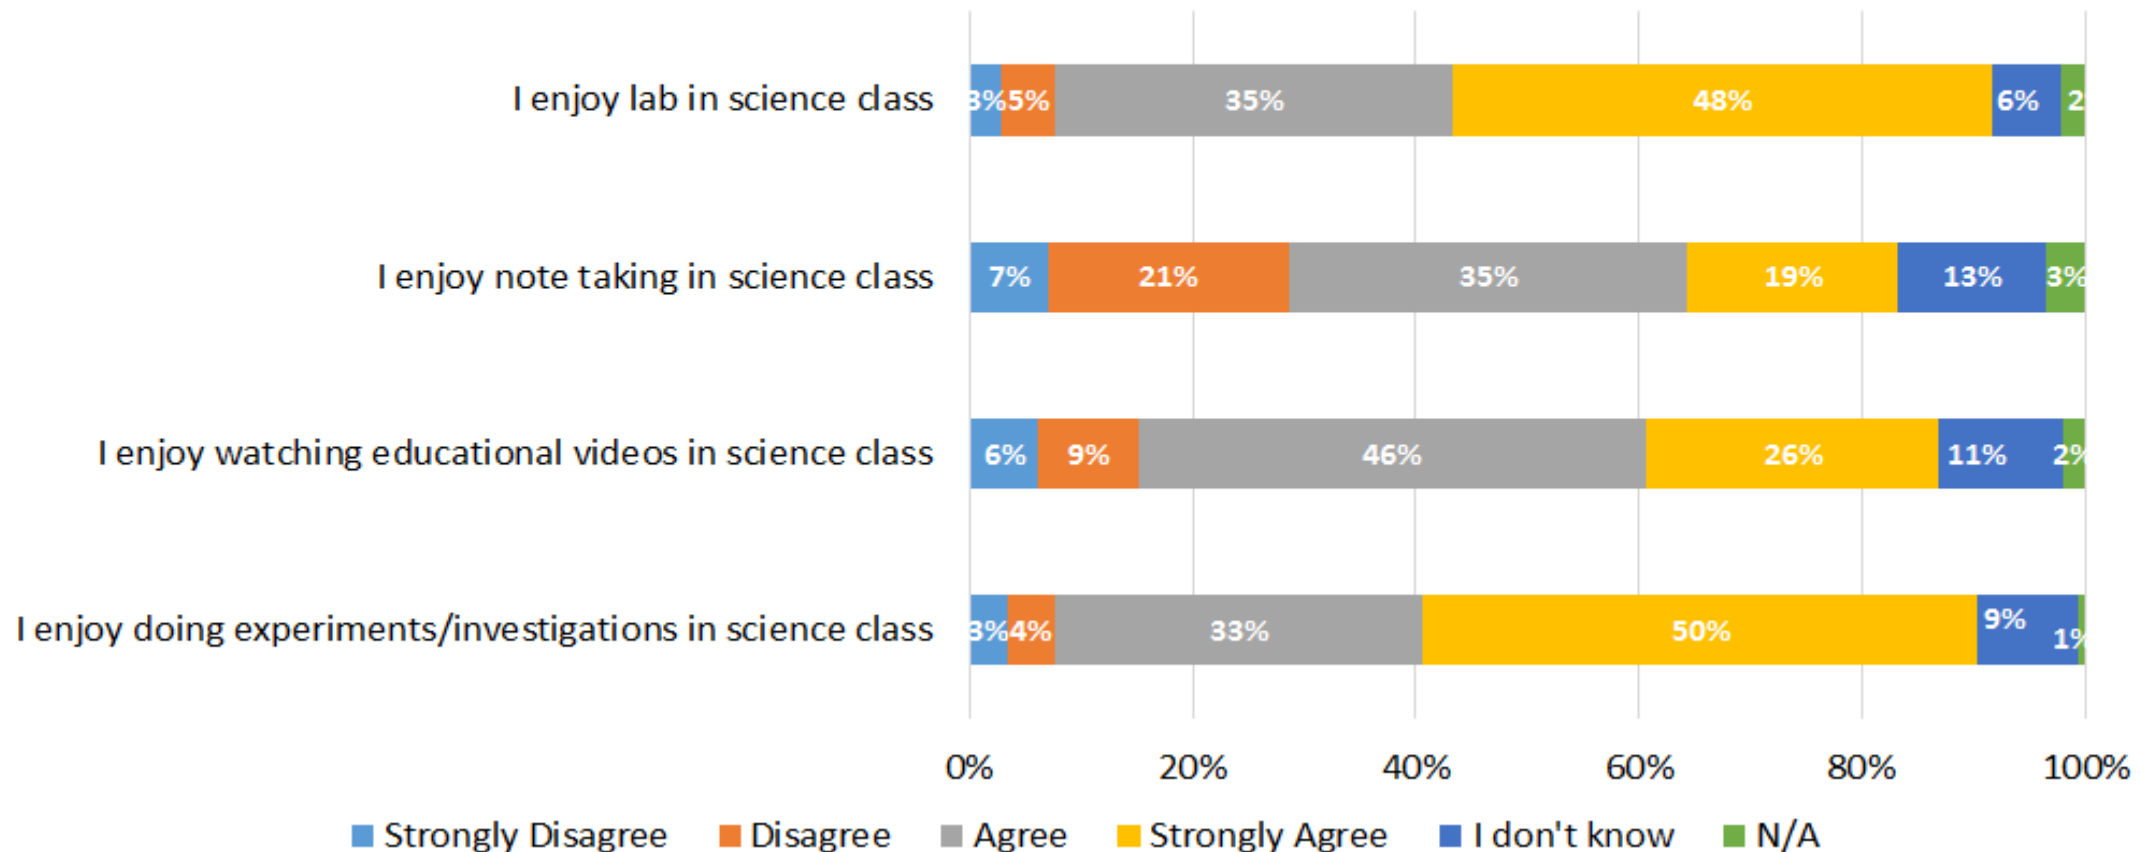

# Finding: Math

Students reported that they enjoy most of the activities listed below.

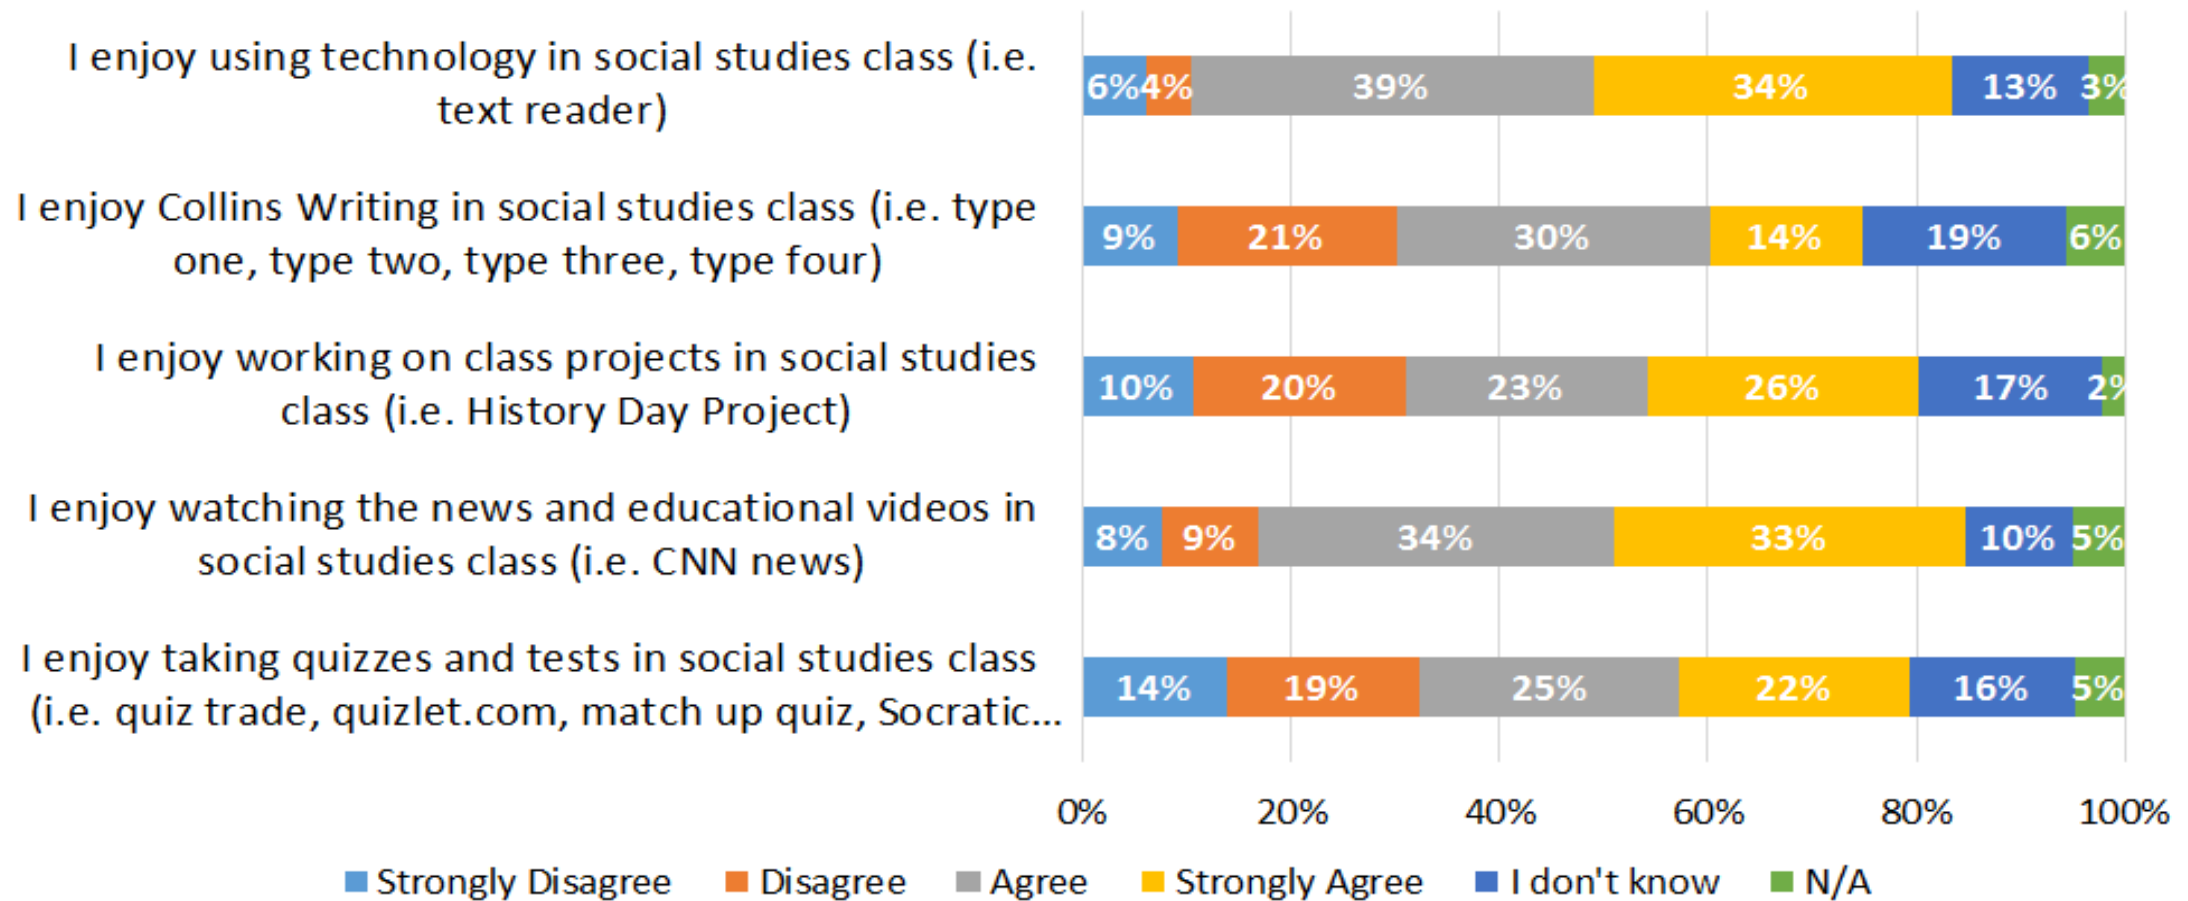

# Finding: Science

Majority of students reported that they enjoy lab and experiments/investigations in science class.

# Finding: Social Studies

**Most students reported that they enjoy using technology in social studies class (i.e. text reader).**

# Recommendations

- YPE team will share these findings with the teachers and administration at HIA.
- Teachers should review the responses by students, and increase the activities that received the most positive responses to their curriculum.

# Lessons Learned/Reflection on Process

- We enjoyed working together as a team, and found that it is fun to work together.
- It's easier to read the data when we put it in a graph.
- We learned about what students thought about their classes.
- We learned how to conduct a survey research project.
- We gained confidence in presenting in front of our classes.

Thank you!
